

Beware the KKK: KOSHER KITCHEN TAX by KOSH!*

\$1,000.00 a year for a "mom and pop" operation
\$40,000.00 per plant for larger industries, —
Millions ripped off per year by rabbis
Who stamp a U or a K on your food!
Levy's "Committee for the Furtherance of Torah Observance"
Stamps the K on your pickles —
Let's see what you get for your trillions of nickles:
"A heathen (non-Jew) who studies the Torah deserves death"
"Death also to Jews who reveal Torah laws to gentiles"
For such knowledge teaches them of the wiles
Of the deceiving double-talk of the Jewish lawyers
Who if they obey the Torah **must** use a double-standard —
Gentiles are "cattle" and to be treated as such.
The U stamp is issued by the "Union of Orthodox
Jewish Congregations of America" and every dumb-ox
American is paying millions on their food bill
To keep the money flowing into the Jewish till.
How is such a racket possible? The answer still
Is that it is done as all Jewish things are done —
Undercover or Hidden or Deceptively.
Gullible doesn't notice. Gullible is not aware.
Gullible finds out, but he doesn't care —
Truly, the goyim are cattle and deserve to die.
700 companies pay this tax today and no one
Dares to use the simple sentence, "Hell no! I won't pay!"
Of course, since the JDL is in 1985 the worst terrorist band alive
It is Kosher to pay up if you want to survive ...
"Schechitah!" the Talmudic slitting of an animal's throat
From ear to ear and letting the animal bleed to death
Is prohibited in enlightened countries like Switzerland.
Beware of the "Schechitah" ritual which produces your hamburgers.
In the French Revolution it was the throats of Kings and Queens
That were slit from ear to ear by guillotines.
Ah! the chopping block, Ah! the kosher butcher shop.
Boycott kosher foods! Don't patronize the slop.

"How many taxpayers in Los Angeles
County know they have been forced to pay
(\$100,000) for the inspection of their food
by rabbis? Why this rip-off? One billion
a year sales of **kosher** products.

TO WHERE? ISRAEL, THE TAX-HEAVEN.

The Loophole Shuttle

Imagine that you are an elderly American Jew worth \$100 million, with one heir and a normal fear and loathing of estate taxes. What to do? You wait until you're about ready to go, catch a fast plane for Israel, renounce your American citizenship, and expire. Presto! Your heir back in the United States gets the whole \$100 million with "not a wooden nickel lost". Unbelievable? The full story is told on page 26 of the Economist (Aug. 24, 1985).

Even as the Internal Revenue Service cracks down on offshore tax havens, notes the article, "Jerusalem the golden" gets an understanding wink. "Israel makes the Cayman Islands seem positively litigious".

This particular Zionist scam began in April 1981, when Israel ended all estate duties. It now taxes inherited wealth only when capital gains are realized. It is true that Section 107 of the American IRS code asserts a claim on the estates of expatriates (except where the emigration occurred at least 10 years prior to death). Yet not once has an expatriate estate actually been contested: there are no cases listed under Section 107. To make the mockery complete, the American heirs can quickly repatriate their full inheritances with no taxes. The real wonder may be that Israel waited 33 years following independence to fully exploit this legal grotesquerie.
